innovation research and development led by
Dr. Onyinye Balogun and Eve McDavid at Weill
Cornell Medicine***

August 1, 2022
Green Brook Country Club

RE
MISSION
FOUNDATION

Welcome & Event Information

Welcome to the 12th Annual ReMission Foundation charity golf tournament. We are extremely grateful to all of you who came out to make this day a success and to all of those who joined our efforts with their generous donations. ReMission Foundation was started to help support those fighting cancer related diseases. The foundation's efforts will be directed towards supporting the many charities that inspire us and are meaningful and significant to our members and friends.

Every single dollar put towards fighting cancer is meaningful and is a dollar well spent. We thank you again for participating and we look forward to your continued support.

GOLD SPONSOR

VOYA™

**Thank you to our Gold Sponsor Voya for
supporting our fight against Cervical Cancer**

About This Year's Cause

Dr. Onyinye Balogun is an Assistant Professor of Radiation Oncology at Weill Cornell Medicine specializing in the treatment of breast and gynecologic malignancies. She is a graduate of Harvard University and Yale University School of Medicine. Dr. Balogun initiated her residency training at the University of Chicago and completed her final year at New York University. She has conducted and published breast cancer research in novel therapeutics for triple negative breast cancer and brain metastases. She is also engaged in gynecologic cancer research as well as global health activities with a focus on improving the delivery of radiation therapy in low and middle income countries.

Eve McDavid is a Google-trained technology executive and Stage IIB Cervical Cancer survivor. In January 2020, Eve was diagnosed with cancer one month before her second baby was due. She underwent aggressive treatment in New York City during the rise of the COVID-19 Pandemic. With her husband's unwavering devotion and the commitment of an unflappable care team led by Dr. Balogun, Eve reached remission in 2021.

Forever transformed by cervical cancer, Eve is a passionate advocate for women's healthcare access, literacy and equity. As a woman in tech who specializes in complex problem solving, she's joined the World Health Organization's fight to eliminate cervical cancer and is collaborating with Weill Cornell Medicine to modernize treatment devices and expand access to care. Eve's work has been featured in [The Washington Post](#), [Insider](#), [Thrive Global](#), and by the [World Health Organization](#) and [ABC-7](#)

Special Thanks to Our Sponsors & Donors
